Background:

As the digital world grows and technology becomes more available to all stakeholders, CHARUSAT also thought of “going paperless and digital” in all their major operation areas. To create a smoother workflow amongst different stakeholders like students and staff members, university has implemented full-fledged automation system named as **e-Governance** since its inception in the year 2009.

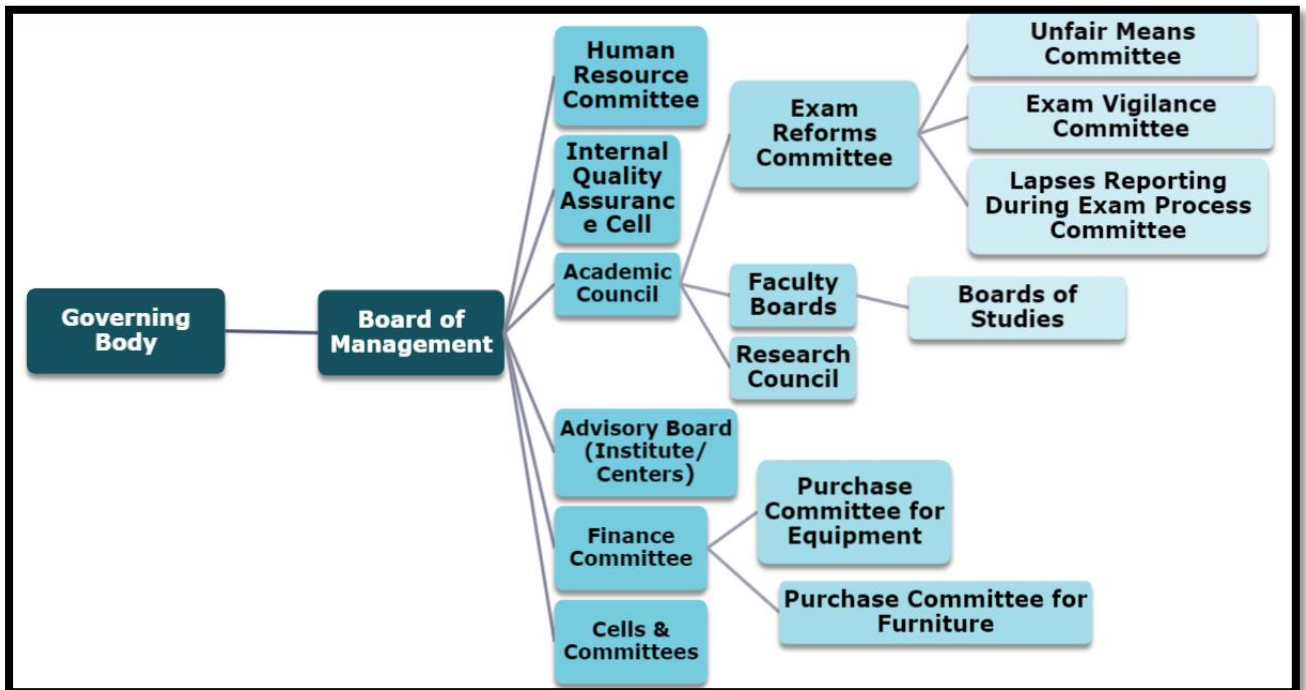

History:

In year 2009, CHARUSAT has implemented an online management system e-Governance in some areas like students’ admission, academic setup and examinations. Year to year various modules have been developed and implemented including finance also. Currently, all major operations in CHARUSAT are being carried out in e-Governance system only. We keep developing newer functionalities and implementing newer modules on day to day basis and strengthening our ERP system.

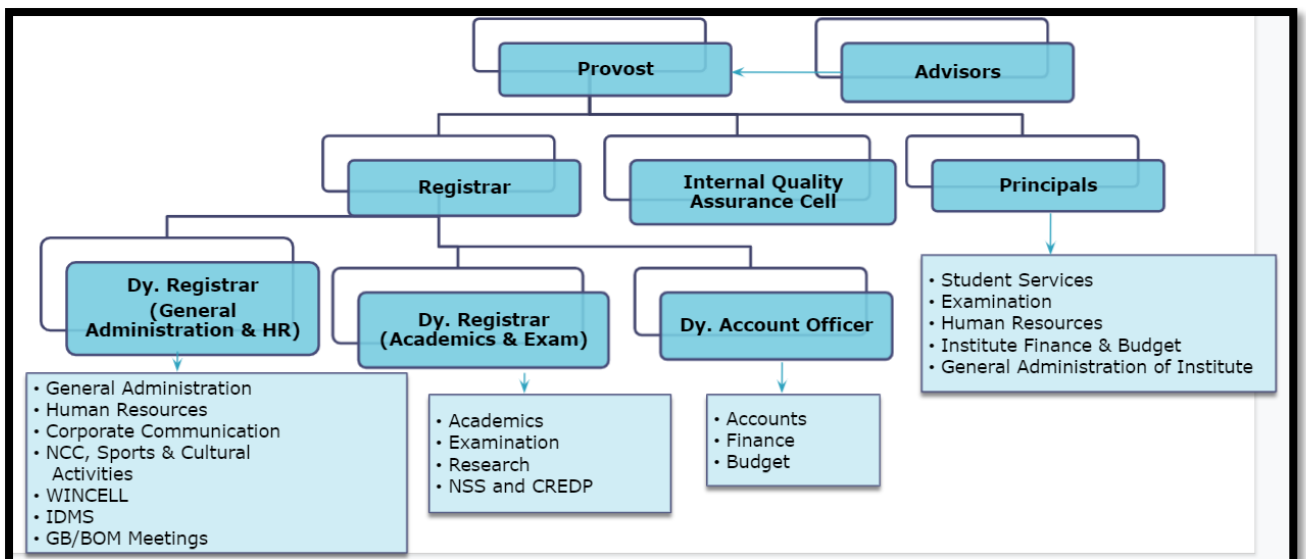

Purpose and advantages of e-Governance:

- Campus-wide integration of a conventional system.
- Reduction or elimination of manual processes.
- Improved strategic decision making and planning capabilities.
- Self-service environment for students and faculty.
- Support of sophisticated and advanced data analyses for use in decision making.
- Integrated workflow for the organization’s best practices and decreased dependence on paper.
- Platform for re-engineering organization practices and continued process enhancements.

ORGANIZATIONAL STRUCTURE OF GOVERNANCE:

ORGANIZATIONAL STRUCTURE OF EXECUTION:

OPERATIONAL METHODOLOGY

Development Methodology

- Initiation phase (Requirement Analysis, Scope, Partners, Potential Gap, Risk, Solutions)
- Definition phase (Functional Requirements, Operational Requirements, Limitations, Boundary)
- Design phase (Front End, Back End design)
- Development phase (Coding as per design, End User Interaction)
- Testing (Various Testing)
- Deployment (Start Using it, Training End User and Key User)

Implementation - Roles and Responsibilities

- Client has to define a Senior Executive who can take/derive organizational decisions and who will be ERP Project Champion, a Middle Senior Executive who can help in execution covering organizational process changes, hardware installations etc. and a System manager who can do overall communication with CHARUSAT and Client users.
- Project Monitoring and Implementation will be joint responsibility of CHARUSAT and Client.
- CHARUSAT and Client both have to declare the team within 15 days from work order confirmation.
- Dedicated Technical team will be appointed by CHARUSAT for onsite Implementation at Client site during implementation period.
- Frequent visit of CHARUSAT Project Manager at Client during the implementation period will be there.
- Periodical implementation report will be provided by CHARUSAT to Client and will be reviewed jointly.
- System manager of Client shall ensure availability of required information on time, manage meeting/training with core users/end users and make sure about the availability of required person and resource by CHARUSAT.
- Core Users / Key Users /end users of Client shall be available with the CHARUSAT Implementation team as and when required.
- Office Space with computers, network connectivity, and CHARUSAT webmail email and Google chat access should be provided by Client during implementation period.

Training Methodology

- During the implementation of the project, CHARUSAT will conduct a detailed training for the Client core user team. The key user training will be to train the key users in the detailed functionality of e-Governance and the configuration aspects. The key users have a role to play even after the project is complete and gone live. They will be responsible for supporting the end users after the implementation is over.
- Technical training will be provided for the System Manager identified from Client, to take care of day to day operations and trouble shooting. This would include, Server management, User management, Device management backup and restore of Database.
- Phase wise detailed training will be provided to end users identified by Client.
- Demo software will be installed for end users to hands on practice and CHARUSAT staff will guide end users personally on their desk for initial entries
- MS Power-point presentations will be provided for easy and quick reference.
- All the training and support will be provided at Client Campus Only.

Post Implementation Support

- After the implementation phase, Client is responsible for database backup and server and its storage management if the product is deployed on Client server. CHARUSAT will assist Client as and when required.
- 6 Months free offsite support will be provided by CHARUSAT after the phase wise production rollout.
- The support will be provided by adding ticket to shared document, via chatting on Google talk with our representative during office hours, by sending an email or on telephone during office hours.
- In general scenario support to resolve any bugs or other issues will be provided from CHARUSAT office.
- Free Support will cover error/issue fix, minor modifications in data entry UI and reports, user training and consultation on phone/chat, Monthly visit of Project Manager/Team Leader to review project status.
